PointX™

ESTIMATING & DIAGNOSTICS

Improve Cycle Time, Increase Profits and Reduce Supplements with Confident Estimating.

UNDER VEHICLE MEASURING

Measure and diagnose with vehicle specific data, magnetic attaching to provide fast and accurate damage estimates. Without a connected database, you are guessing. Document your work and get paid for your work.

UPPER BODY MEASURING

From under hood, door and glass openings, radiator supports and tail light pockets; the PointX is your tool for productivity. Get the data you need to get paid for the work you perform.

BENEFITS

- Upper body Point-To-Point measurement capability — measure the entire vehicle.
- Bluetooth communication with Vision2 PointX Software — no need for cords or cables.
- Electronic documentation with printed report — Get paid for your work.
- Automatic height calculation while measuring under the vehicle.
- Lightweight, efficient and easy-to-use carbon fiber measuring device.

INCLUDES

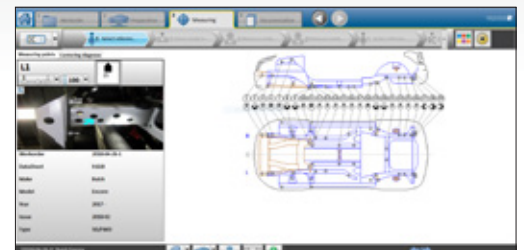

- A new generation measurement device with color display.
- Vision2 PointX software and measuring adaptors.
- Panasonic Toughbook and data subscription for the first year.

Measuring with PointX is Quick and Easy!

1. Select the year, make and model from our database of thousands of vehicles.
2. Select the points you desire to measure and get started.
3. Diagnose and blueprint the vehicle according to the measured points. Print the report for the next step in your repair process.
