benchrack™ VERSA

UNIVERSAL FLEXIBILITY

Unrestricted Operational Efficiency and Increased Ergonomics

BenchRack™ Versa guarantees seamless accessibility, regardless of the vehicle shape or size, making it a versatile solution for various collision repair needs.

It provides full 360° vehicle access to attach the Draw Aligner, allowing technicians to perform complex repairs with exceptional accuracy, reducing cycle time and maximising repair efficiency.

Optimal Ergonomic Work Posture

Car-O-Liner™ designs products by closely observing work processes and identifying optimal ergonomic enhancements to benefit every technician. Developed with a keen focus on ergonomic work postures, the BenchRack™ Versa aims to minimise work-related strain injuries.

PURPOSE-BUILT FOR IN-GROUND INSTALLATIONS

Introducing the BenchRack™ Versa, the latest lifting innovation in collision repair technology from Car-O-Liner™.

This state-of-the-art solution is perfect for in-ground installations, saving valuable floor space while ensuring maximum productivity and efficiency.

Engineered for excellence, the BenchRack™ Versa is designed to revolutionise your workshop by providing unmatched lifting capabilities, enhanced ergonomics and compliance with OEM requirements.

Whether you're working on low-profile sports cars, SUVs, or light delivery vans, the BenchRack™ Versa offers the versatility and performance you need to handle any repair job with ease and precision.

Powerful Control

The 10-ton Draw Aligner pulls from almost any angle, 360° around the vehicle. A second Draw Aligner can be added for double the pulling power.

Elevate your shop's capabilities with the new **in-ground** BenchRack™ Versa

Extended Lifting Capability

The BenchRack™ Versa offers an increased lifting capability of up to 1.450 mm (58") that significantly enhances the ergonomic working height and provides greater comfort and efficiency for technicians.

1.450mm | 58"

Extended Pillar Jacks

The new reinforced pillar jacks have extensions to compensate for pit depth and a reduced weight to provide a more ergonomic experience for technicians.

OEM-COMPLIANT VEHICLE LIFTING

The new short ramps facilitate lifting by the wheels, allowing for a fast and secure process to position the vehicle at an optimal working height. The ramps are made of high-strength steel and aluminium to minimise weight and improve ergonomics.

Additionally, these ramps are strategically positioned higher on the frame, enabling quick diagnostic measurements while the vehicle remains on the ramps, enhancing both efficiency and safety. Additionally, the low-profile, lightweight ramps ensure compliance with OEM requirements, particularly for EVs.

OEM APPROVED
PRODUCTS

Car-O-Liner is the leading brand with the most OEM-approved equipment in the collision repair market. We achieve these approvals through our close relationship with manufacturers to ensure we meet the strict requirements for the highest level of repairs and industry standards. Our dedication to maintaining this close relationship enables us to offer customers a range of products that are not only dependable but also endorsed directly by the manufacturers. When it comes to reliability, Car-O-Liner stands head and shoulders above the competition.
